

Matt Scragg ***Avid Offline / FCP Editor***

Profile

Matt comes from a technical background starting out at Fuji International, but his passion for film started with theoretical cinema study - including linguistics, psychology and narrative construction - and followed by putting into practice the vast amount of knowledge he'd accumulated during his years as a broadcast television editor.

He applied these skills to his cut of *Heroes & Villains* which garnered critical acclaim, a real achievement for his first feature film. Matt is incredibly talented and is a real asset to have on board a production.
